

APPLICATION OF ORGANIC FERTILIZER (6:3:12s +3 MgO)

BANANA and PLANTAIN

1 bag (55lbs) can fertilize to 10 banana or Plantain plants in one application

- Apply 5lbs of fertilizer plant
- Apply 2lb of fertilizer (2 large carnation tin) in the hole and mix thoroughly before planting
- Additionally, place 3lbs fertilizer around the plant approximately 2ft from the base and mound soil over the fertilizer after each application.

TREE CROPS

Young Tree Crop:

Apply 2lbs of fertilizer in the hole and mix thoroughly before planting

Mature trees (1 to 3 yrs.)

Apply 15 lbs. fertilizer three time a year: Apply around the plant approximately 3 to 4 ft or at the edge of the leaf drop, then cover with soil.

Example

1st application of 5lbs in February

2nd application of 5lbs in May

3rd application of 5lbs in November
